

Uday Kumar G B.E AI/ML Engineer

✉ udaykumargudagudi961@gmail.com ☎ 8618628618 📍 Bangalore 📄 Portfolio
🌐 linkedin.com/in/udaykumargudagudi 📄 github.com/udaykumar5683

B.Tech graduate in Artificial Intelligence and Machine Learning focused on building practical AI systems, with hands on experience in multi agent workflows, LLM applications, retrieval systems, prompt engineering, and deep learning. Built an AI career agent using CrewAI and Groq API, and AI recommendation system, and an image restoration pipeline using CNNs. Comfortable learning new AI tooling from documentation and taking projects from design to working prototype.

EDUCATION

B.Tech. - Artificial Intelligence and Machine Learning,

Ballari Institute of Technology and Management

2026 | Bellary

Percentage: 81 (CGPA: 8.1)

12th PUE Karnataka, PCMC,

Sri Vidyaniketan PU College

2022 | Gangavathi

Percentage: 85

10th KSEEB, Little Hearts School

2020 | Gangavathi

Percentage: 84

INTERNSHIPS

Cloud Computing Intern,

SmartBridge Educational Services Pvt. Ltd.

02/2026 – 05/2026 | Ballari

- Completed VTU-sponsored internship focused on AWS Cloud technologies.
- Gained hands-on experience in cloud deployment, storage management, and security concepts.
- Learned cloud architecture fundamentals and best practices for scalable applications.
- Completed practical assignments and cloud-based projects as part of the internship program.

Python Developer, EZTS IT/Computers - Software

04/2024 – 05/2024 | Ballari

- Engineered Python automation scripts using OOP and functional programming to streamline workflows, boosting team productivity by 40%.
- Delivered 10+ logic-based automation modules, strengthening backend skills and AI-based application development foundations.

CERTIFICATES

- Data Analytics Job Simulation - Deloitte
- Data Science Job Simulation - British Airways
- Getting Started with Enterprise AI - IBM
- AWS Cloud Quest: Cloud Practitioner – AWS
- Google Cloud Career Launchpad – Google Cloud

SKILLS

Programming Languages

- Python
- Java
- SQL

AI & Product Development

- Prompt Engineering
- Multi-Agent Systems
- Generative AI Applications
- AI Workflow Design
- Rapid Prototyping
- Product Development

Tools

- GitHub
- VS Code
- Google Colab
- Jupyter Notebook
- Firebase
- AWS Basics

Tools & Platforms

- ChatGPT
- Claude
- Gemini
- Groq
- Hugging Face
- CrewAI
- LangChain

Technical Concepts

- Machine Learning
- Deep Learning
- NLP
- Computer Vision
- Database Fundamentals
- Software Development Lifecycle

PROJECTS

Image Restoration and Enhancement System 📄,

Tech Stack: Python, OpenCV, TensorFlow, CNN, Deep Learning

- Designed a CNN-based pipeline improving low-light and overexposed image visibility baseline methods.
- Trained deep learning models on 5,000+ image samples, attaining a quality improvement rating in evaluation tests.

AI Career Agent 📄, CrewAI, Groq API, Python, Streamlit, Serper API

Demo Video 📄

- Built a multi-agent AI career assistant using CrewAI to analyze resumes and generate job insights, skill gap analysis, learning roadmap, and interview preparation.
- Implemented a placement prediction system with automated report generation (JSON/PDF) and optional Telegram notifications.

AI Fashion Outfit Recommendation System 📄,

Tech Stack: Python, Streamlit, Groq API, ChromaDB/FAISS

Live 📄

- Designed and developed an AI-powered fashion assistant capable of understanding natural language queries and recommending complete outfits.
- Implemented semantic retrieval and explainable recommendations using product metadata and LLM integration.
